Risk Level	Low
Confidence	90%

Recommendations:

I'm so sorry to hear that you're feeling under the weather with a cold! As an AI Multimodal Rural Healthcare Assistant, I'd like to help you feel more comfortable and provide some guidance on how to take care of yourself. **Medical Disclaimer:** Please remember that I'm not a medical professional, and this information is based on general guidelines and available resources. If your symptoms seem severe or you're unsure about what to do, please seek immediate medical attention. To help manage your cold and prevent complications: 1. **Stay hydrated**: Drink plenty of fluids, such as water, tea, or soup, to help loosen mucus and soothe a sore throat. Aim for at least 8-10 glasses of fluid per day. 2. **Rest**: Get plenty of rest to help your body fight off the infection. Aim for 8-10 hours ...
